EXPERIENCE

GenAI Intern at Salescode.ai - Worked with the GenAI team at Salescode.ai, whose SFA / eB2B / SCAI platform serves 60+ brands including Coca-Cola, ITC, Mars, and Emami. - Contributed to the AI Sales Coach product used to train and evaluate field sales reps, working across backend, data pipelines, and frontend and collaborated with the team on a live, multi-tenant production system, shipping features used by real enterprise customers.	May 2026 – July 2026
MERN Stack Developer <i>Freelance</i> - Worked with a team to develop the frontend and backend architecture for sKrapy, a startup platform focused on digitizing the scrap management ecosystem through robust vendor verification and order processing. - Independently developed and deployed a digital marketing platform for a US-based client, collaborating with a creative team of animators for branding elements such as logos and videos.	March 2025 – June 2025 <i>Remote</i>

PROJECTS

AI Sales Coach (Sensei) Built the frontend and backend for an AI sales coaching platform on FastAPI + PostgreSQL, AI-generated courses (plans, quizzes, practice scenarios, videos via Langflow), real-time voice practice over LiveKit, and Kafka-driven post-call scoring with scorecards and leaderboards. Added multi-tenant RLS, RBAC, and real-time in-app and push notifications (FCM + SSE + Redis pub/sub).	
AayuLink (SIH Hackathon) Developed a scalable digital medical identity system enabling real-time MDR pathogen tracing, infection control, and record synchronization across hospitals. Built a fault-tolerant document ingestion pipeline with 99.8% upload reliability and 60% lower media latency via Cloudinary–MongoDB optimization.	GitHub Link
